LAMETT

A feeling of warmth and cosiness. A relaxed ambience. Enjoying not just the great things but also the small everyday details. Our floors truly add to your daily life. Another piece in the jigsaw which helps to build a cosy home.

At Lamett we strive to offer a collection range to suit every personality. Our mission, for us, is a true passion: selecting the right trees, choosing which parts of the trunk to use, how we work and finish the boards. It takes a lot of patience and love for nature for our collection to take shape.

Our parquet range is based on what nature can offer us. Not the other way around. There is no better designer than nature: each individual oak is unique in terms of design, colour and beauty.

The slogan Close to nature perfectly reflects our collections. Spontaneity, sincerity, and a natural touch.

This is Lamett at its best. Close to nature.

Bruno Descamps
Managing Director

*There is no better designer
than nature.*

DESIGNED BY NATURE

Wood – and oak in particular – is naturally rich in shades, with countless variations in patterns and grain structure. Its structure is influenced by where the oak grows, the climate, seasons and of course time. Some trees survive for over 200 years. Each tree is unique, with its own authentic character.

For each collection, the boards we use are subject to specific standards. For example, based on the number of knots, the presence of grooves, shading and other quirks of nature. Traditional techniques bring out the character of the wood, be it tough and sturdy or sleek and elegant. All of which is possible with oak.

What you want yourself will also be unique...

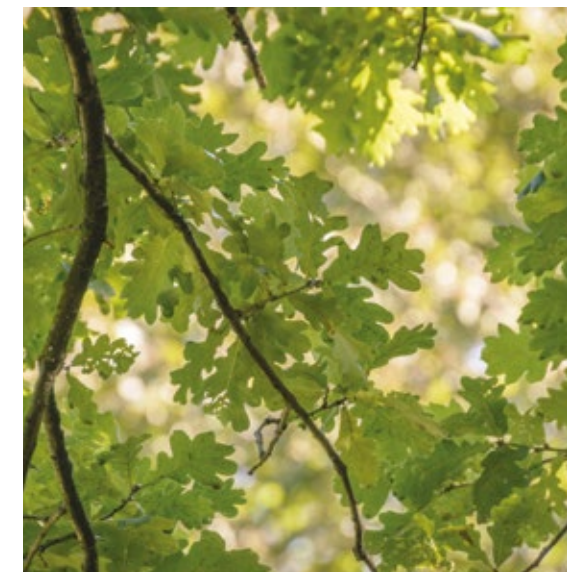

Do take your time when choosing the floor that is right for you. Check things out thoroughly, visit a distributor and see the sample floors on our website to get a good idea of what is possible. A good advance assessment makes for a satisfied customer. That is what we aspire to!

Atmosphere & quality

MADE WITH LOVE

Continually upgrading our production processes serves to ensure a constant and optimum quality. And yet, this involves a lot of craftsmanship: scraping out and filling of knots, surface distressing, grain weathering techniques,... Almost everything is achieved manually.

Lamett takes no half measures: our floors are delivered ready for use. These floors can be enjoyed and appreciated from the outset. Be sure to check out on lamett.eu our video of the Farm collection production process. This film shows all the steps that this collection undergoes prior to installation.

PRODUCTION AND DISTRIBUTION

In less than 15 years, Lamett has grown into one of the most important parquet flooring specialists in Europe. As a producer and distributor, we have built up an excellent reputation for top quality, finish and service. We are proud of our achievements!

BELGIUM / DEERLIJK

Lamett's main distribution centre is in Deerlijk, Belgium. From here, our products are distributed throughout Europe and beyond. Some collections are oiled here, manually and with attention to detail.

CZECH REPUBLIC

Morava Wood, our subsidiary in the Czech republic, manufactures solid parquet flooring. Here, our craftsmen use the latest technologies to make the most beautiful floors.

ASIA

In our factory in China we mainly produce parquet flooring that undergoes a labour-intensive process.

WHY OPT FOR LAMETT PARQUET FLOORING?

IN LOVE WITH OAK

We love oak! Oak is typical for its natural colour variations: yellow-brown to dark-brown. Unfinished oak is very neutral in colour. Additional treatments such as age smoking, staining, aging and/or colouring of boards will produce for you the floor of your choice.

MANY COLLECTIONS & COLOURS

We want your parquet floor to perfectly suit your interior style. Rural or modern, light or dark: whatever the interior, we have the perfect solution.

UNDERFLOOR HEATING

Parquet and underfloor heating go perfectly together. All our collections, with the exception of Vienna, can be installed on underfloor heating.

TECHNICAL SUPPORT

Parquet flooring is quite complex and requires much technical expertise. With our many years of experience we know the process through and through. For us it is a matter of course: advising you before, during and even years after installation of your parquet floor.

20 YEARS WARRANTY

Our parquet floors come with a 20-year warranty. If your Lamett parquet flooring is installed and maintained according to the instructions, durability for many years will be guaranteed.

Courchevel - Villa

SELECT / LIGHT RUSTIC COLLECTIONS

‘Simple’ and ‘calming’ are two characteristic features of the select / light-rustic collections. Here you will find few if any knots in the wood. The colour variations too are rather limited.

Do you prefer the charm of a more rustic floor? Go to page 43.

02. SELECT / LIGHT RUSTIC

COURCHEVEL

RUSTIC A

This select parquet has a beautiful grading.

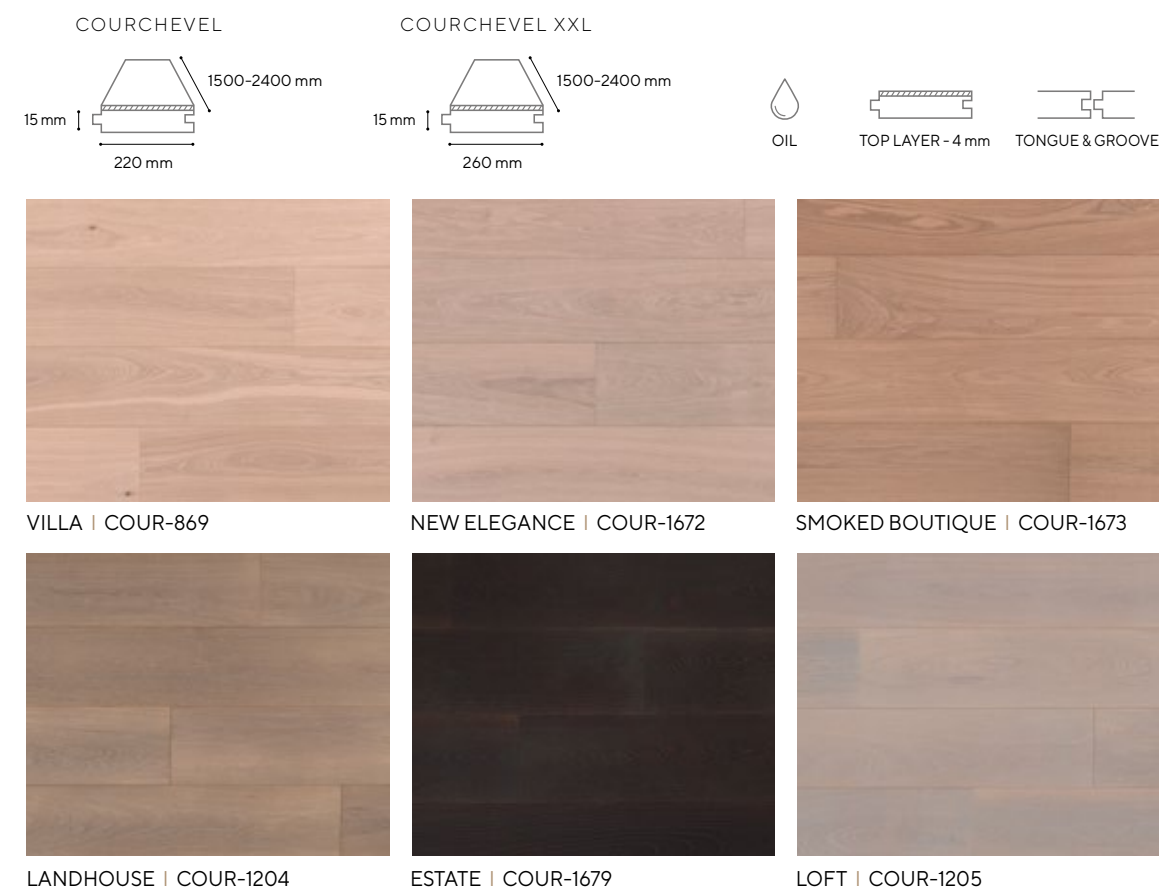

The 4 mm oak top layer is applied to a birch plywood, the best on the market.

The boards are carefully selected and contain few colour variations and just a few small knots.

The Courchevel range comes with a high-quality oil finish.

Also available: the XXL version with extra-wide boards (260mm).

This collection has been developped for a very exclusive project in a french ski resort. Guess which...

Dream a little dream...

Log onto lamett.eu to order free samples.

The Dream Box will be sent to you the very next day. This will help you get a good idea as to which floor finish will work best for you in your home.

Courchevel - Villa

Courchevel - Villa

02. SELECT / LIGHT RUSTIC

SORRENTO

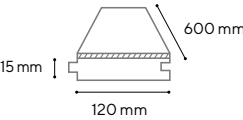

RUSTIC A

The herringbone pattern has made a big comeback in parquet flooring. This gives your home a classic, luxurious look. Also beautiful in modern interiors, if choosing a light colour.
When the floor is installed without a skirting, running tightly against the wall, this gives it a minimalistic character.

BERGAMO

1 BIS

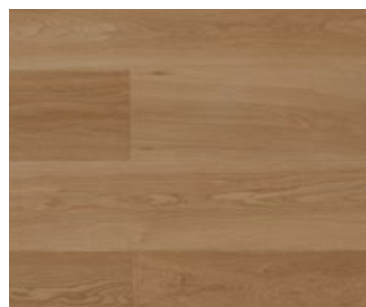

Bergamo is an exclusive parquet with a very natural beauty. Only the heartwood of the trunk is used. As a result, this collection has virtually no knots. The boards are assessed piece by piece, because sapwood (white wood) is not allowed. This parquet flooring comes with a top-quality oil finish.

Humidity and parquet flooring

Wood is a natural product and is sensitive to the relative humidity in the room. An optimum humidity level of 45-65% applies. The fluctuating humidity during the seasons will cause your parquet to expand and contract a little. This is a natural process with parquet.

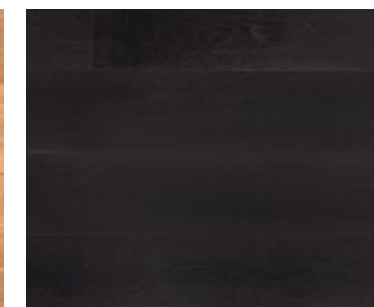

Fortunately, this is easy enough to manage: good ventilation is a key factor. Does the air still seem too dry? In that case try using a humidifier.

Oil or varnish? Both have their advantages!

With oiled parquet, the oil is applied and wiped off until the wood fibres are completely saturated. The oil offers a repellent layer that protects against dirt and moisture. This layer is enhanced based on a weekly and semi-annual maintenance programme. This maintenance is important. Otherwise you will soon find stains on your floor. Never use pure water on oiled parquet flooring: always use a proprietary soap (e.g. Woca Natural Soap).

When varnish is applied on parquet, a film is formed on the surface that fully seals the pores in the wood. This serves to better protect the parquet against moisture. A varnished parquet floor can be well-maintained with an all-purpose cleaner. Over time, a grey appearance may become visible in places where people tread a lot. These micro scratches can be remedied by maintaining your floor annually with a polish (e.g. Bona Wood Floor Polish).

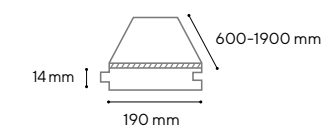

02. SELECT / LIGHT RUSTIC

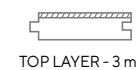

STOCKHOLM

RUSTIC A+

Stockholm is a well-oiled parquet floor with a clean but natural look. An ideal choice if you do not like a clean board with no knots, but also prefer to avoid the rustic look.

Scratching... prevention is better than cure

Small scratches and stains in your parquet floor can be repaired with the right treatment. Naturally, prevention is better than cure! With these tips you can enjoy your parquet for longer, with fewer worries:

- Attach pads under the legs of tables and chairs.
- Do not lift a piece of furniture if you want to move it. Dragging it will not be beneficial for your furniture or your floor.
- Try to avoid objects with a sharp point (such as cutlery) falling on the floor.
- Regularly maintain your floor with the recommended proprietary products. This makes your parquet floor less prone to damage.
- If you are vacuuming, make sure the brush bar is engaged.

*Home is not a place,
it's a feeling.*

Farm - Old Church

RUSTIC COLLECTIONS

Typical rustic collections are rich in colour shades and the presence of knots. Some collections such as Farm and Country are processed intensively by hand, giving them an extravagant touch. Each and every board is unique! Made by nature, crafted by men.

03. RUSTIC

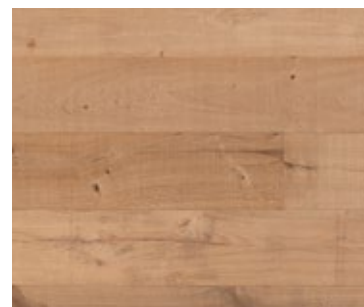

CARCASSONNE

RUSTIC B+

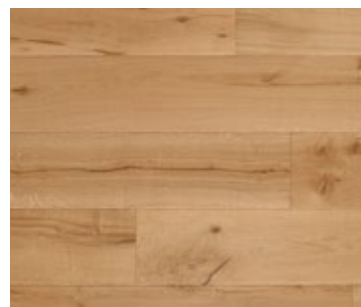

Carcassonne is an original parquet floor with an aged and rugged look. The authentic saw grooves from the sawmill are visible on the parquet surface. These are random and can be lighter or stronger depending on the density of the wood.

The wood we select has beautiful weathered knots and cracks which are partially left open on purpose. They give the collection an exclusive, rustic look.

A special oil is applied to the surface which gives a finish with optimal protection.

PARQUET FROM A TO Z

We do not tire talking about parquet! The answers to the most frequently asked questions can be found in the Parquet Bible, which you can download for free at lamett.eu. This is a comprehensive reference work for the layman and craftsman alike.

Still have a question? Contact us! We are happy to help and advise you...

SOLID OR MULTI-LAYER PARQUET? PLEASE EXPLAIN

A solid parquet consists of a solid block of wood. A tongue and groove fit is then provided. Most people think that a solid board is the solution for parquet floors. But solid parquet is prone to shrinkage and expansion. For this reason it is often not recommended. However, if you accept that a solid board 'lives' and can shrink or expand during winter and summer, there is no problem.

Lamett's Vienna collection is the only solid parquet we use.

Multi-layer parquet, also often called laminate parquet or composite parquet, is comprised of 3 or more layers of wood that are placed over each other at right angles. The top layer is hardwood (Lamett uses oak). This layer is at least 2.5 mm thick; those underneath are made of wood products based on coniferous or chipped timber material. Due to the right-angle gluing, there is minimal expansion etc. compared with solid parquet. Multi-layer parquet is much more stable.

PARQUET IN THE KITCHEN OR THE BATHROOM? YES, BUT...

Parquet can be installed in the kitchen or bathroom but extra precautions are necessary. Therefore this tends to be discouraged by us. Experience has taught us that even with excellent maintenance and thorough precautions, it is very difficult to keep your parquet flooring problem-free in these areas. For this reason the Lamett guarantee does not apply to kitchen and bathroom installations.

ACCESSORIES

At Lamett you will find an extensive assortment of accessories such as skirting boards, profiles, glue, etc. Order them at a retail outlet or check out our webshop on lamett.eu. Also on offer is a wide range of good quality maintenance products.

MAINTENANCE

Daily maintenance involves vacuuming or sweeping the parquet with a soft brush. Make sure to engage the brush bar to avoid scratching.

Oiled parquet floor

Never clean an oiled parquet with pure water. Always add a nourishing maintenance product for oiled parquet, such as Woca Natural soap. Each year, use an extra nutrient conditioner such as Woca Oil Conditioner. The better the care, the better your floor can withstand stains, not to mention expansion or shrinkage.

Varnished parquet floors

In principle, our parquet can be mopped with clean water. To offer better protection, we recommend Bona Wood Floor Cleaner. Normal wear and tear give rise to very small scratches in the varnish layer. For this reason, the varnish layer will benefit from an annual replenishment programme. This can be achieved with a good-quality polish such as Bona Wood Floor Polish.

3 golden tips:

- 1. Never apply water excessively on parquet!
- 2. Mop with lukewarm water.
- 3. Follow the dosage instructions for your maintenance products.

Underfloor heating and parquet floors: is that possible?

Parquet can be combined with underfloor heating or cooling very well. The floor will keep looking good and your efforts will not be in vain, as long as you take a few things into account.

- Choosing a multi-layer parquet is advisable. The wood layers are glued at right angles to each other and this serves to virtually prevent any shrinkage or expansion.
- If combined with underfloor heating and cooling, it is best to opt for full bonding, otherwise you will get an insulating layer of air that makes the room more difficult to heat up or cool down.
- Parquet needs time to acclimatise. Avoid warming up or cooling the room too quickly.

For more details, see the Parquet Bible by logging onto our website: lamett.eu.
